PROCEEDINGS OF THE WORKSHOP ON BUSHFIRES: METEOROLOGY AND DYNAMICS

T. Beer vii Foreword

1. INTRODUCTION

C. M. Purton 1 Is bushfire modelling a science? Impressions from recent legal cases involving bushfire damage

N. P. Cheney 9 Quantifying bushfires

M. E. Alexander and D. Quintilio 17 Perspectives on experimental fires in Canadian forestry research

2. COMPUTER MODELS

N. J. H. Gellie 27 Improving models with PREPLAN—a description of the current system and what is needed

R. H. D. McRae 37 Use of digital terrain data for calculating fire rates of spread with the PREPLAN computer system

T. Beer 49 The Australian National Bushfire Model Project

D. G. Green, A. Tridgell and A. M. Gill 57 Interactive simulation of bushfires in heterogeneous fuels

I. A. French, D. H. Anderson and A. Catchpole 67 Graphical simulation of bushfire spread

3. EMPIRICAL AND ANALYTICAL MODELS

R. Hosking 73 Grassland curing index—a district model that allows forecasting of curing

P. G. Baines 83 Physical mechanisms for the propagation of surface fires

R. O. Weber 95 A model for fire propagation in arrays

4. METEOROLOGY

R. A. D. Byron-Scott 103 The effects of ridge-top and lee-slope fires upon rotor motions in the lee of a steep ridge

M. R. Raupach 113 Similarity analysis of the interaction of bushfire plumes with ambient winds
